
WASHINGTON, D.C. — American Fuel & Petrochemical Manufacturers (**AFPM**) **President and CEO Chet Thompson** today issued the following statement on EPA’s announcement of a supplemental proposal to reallocate regulatory obligations from past and future years as part of the 2026-2027 Renewable Fuel Standard:

“Consider EPA’s announcement a multi-billion dollar-addendum to its already-historic \$70 billion-per-year RFS proposal. Make no mistake, reallocation is a mandate for more imports and higher prices for consumers. Americans and U.S. refiners should not have to pay for this nonsense.” –
Chet Thompson, AFPM President and CEO

About AFPM:

The American Fuel & Petrochemical Manufacturers (AFPM) is the leading trade association representing the makers of the fuels that keep us moving, the petrochemicals that are the essential building blocks for modern life, and the midstream companies that get our feedstocks and products where they need to go. We make the products that make life better, safer and more sustainable — we make progress.
